                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              RESULT 785

US-09-48-754A-3102/c

US-09-48-754A-3102/c

Sequence 3102, Application US/09848754A

Publication No. US20030073207A1

GENERAL INFORMATION:

APPLICANT: Ribozyme Pharmaceuticals, Inc.

TITLE OF INVENTION: Levels of Epidermal Growth Factor Receptors

FILE REFREENCE: MBHB00-958-I (400/018)

CURRENT APPLICATION UNDER: US/09/648,754A

CURRENT PILING DATE: 2001-05-03

NUMBER OF SEQ ID NOS: 9645

SOFTWARE: Patentin version 3.0

SEQ ID NO 3102

LENGTH: 17

Sequence 781, Application US/1025023
Sequence 781, Application US/1025023
Fublication No. US20030175950A1
GENERAL INFORMATION:
APPLICANT: Ribozyme Pharmaceuticals, Inc.
APPLICANT: Misozyme Pharmaceuticals, Inc.
TITLE OF INVENTION: RNA Interference Mediated Inhibition of HIV Gene Expression Usi;
TITLE OF INVENTION: Interfering RNA
FILE REFERENCE: 400/054 (WHBBOL-665-B)
CURRENT FILING DATE: 2003-01-06
PRIOR APPLICATION NUMBER: US 60/398,036
PRIOR FILING DATE: 2002-07-23
PRIOR FILING DATE: 2002-05-29
PRIOR PRIOR PRIOR DATE: 2002-05-29

Sequence 35, Application US/10263872

Publication No. US2030124585A1

GENERAL INFORMATION:

APPLICANT: Millar, Robert P

APPLICANT: Conkin, Darrell

TITLE OF INVENTION: Type II Gonadatropin - Releasing Hormone Receptor and Polynuclee

TITLE OF INVENTION: Encoding Therefor

TITLE OF INVENTION: DATE: 2002-10-02

CURRENT APPLICATION NUMBER: US/10/263,872

CURRENT FILING DATE: 2002-10-02

NUMBER OF SEQ ID NOS: 43

SEQ ID NO 3: ABLENTION OF SEQ ID NOS: 43

SEQ ID NO 3: ABLENTION OF SEQ ID NOS: AB
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         NAME/KEY: misc feature

US-09-848-754A-17/c

Sequence 17, Application US/09848754A

Publication No. US20030073207A1

GENERAL INFORMATION:

APPLICANT: Ribozyme Pharmaceuticals, Inc.

TITLE OF INVENTION: Levels of Epidermal Growth Factor Receptors

TITLE OF INVENTION: Levels of Epidermal Growth Factor Receptors

FILE REFERENCE: MBHB00-958-I (400/018)

CURRENT APPLICATION NUMBER: US/09/848,754A

NUMBER OF SEQ ID NOS: 9645

SOFTWARE: Patentin version 3.0
